One Step Division Worksheets
Mid level Division worksheets for kids

In this division worksheet, kids will practice their division skills learned so far. They need to write the quotient of the problem from their memory, without drawing. Kids are encouraged to update their times tables skills. Below are the one step, zero remainder division problems. Couple of them are done as examples.

1) $35 \div 7 = 5$

Think; **what** times 7 is 35?

2) $16 \div 2 =$

3) $18 \div 2 =$

4) $15 \div 3 =$

5) $15 \div 5 =$

6) $9 \div 3 =$

7) $18 \div 3 =$

8) $16 \div 4 =$

9) $20 \div 5 =$

10) $24 \div 4 =$

11) $20 \div 2 =$

12) $30 \div 5 =$

13) $32 \div 4 = 8$

14) $36 \div 4 =$

15) $10 \div 10 =$

16) $40 \div 5 =$

17) $12 \div 6 =$

18) $24 \div 6 =$

19) $14 \div 7 =$

20) $45 \div 5 =$
