

Basic Division Worksheets Level 2

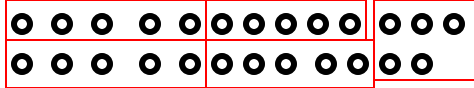

Introductory [Division worksheets](#) for kids

To complete this division worksheet, you have to draw. Draw the objects of your choice and find the quotient for each problem. *First one is done as an example.*

1) Find $25 \div 5$

Draw 25 circles. Make groups of 5 as shown below.

Then count the number of groups

you made. Here, we

have 5 groups of 5, hence the quotient is 5. Write your

answer as $25 \div 5 = 5$

2) Find $32 \div 4$

3) Find $10 \div 5$

4) Find $15 \div 5$

5) Find $36 \div 4$

6) Find $40 \div 4$

7) Find $30 \div 5$

8) Find $12 \div 6$

9) Find $18 \div 6$

10) Find $35 \div 5$
